

Baby's Health
is wonderfully protected and colic, diarrhoea, constipation, and other stomach and bowel troubles are quickly banished or avoided by using

MRS. WINSLOW'S SYRUP
The Infants' and Children's Regulator

This remedy quickly aids the stomach to digest food and produces most remarkable and satisfying results in regulating the bowels and preventing sickness.

Pleasant to give—pleasant to take. Harmless, purely vegetable, infants' and children's regulator, formula on every label. Guaranteed non-narcotic, non-alcoholic.

At All Druggists

Passing the Third Floor Up.
"Us women are going to vote and so I thought I'd read up on the law," she said confidentially.
"Yes, ma'am," expectantly.
"Can I look at it?" inquiringly.
"What department of state, madam, are you looking for?" anxiously.
"Why, the museum," convincingly.
"Quite so, quite so. That really is the place where quite a number of them should be found, but we are so crowded for space that they still are all up in the law library. Mr. Bailey, take the lady up to the third floor."

Richard Lieber, director of the department of conservation of Indiana, was the expectant, anxious and meek person in the story. — Indianapolis News.

Decorative Splendors.
"Riches have wings."
"True," replied Miss Cayenne. "But the effect depends on the intelligence with which they are utilized. The most beautiful ostrich feather is likely to look a trifle shabby on the original bird."

It All Depends.
"Papa, what do you call a man who drives a motor car?" "It depends upon how near he comes to hitting me."

The Sin in Cinema.
"Have you seen any of those color movies?"
"A few off-color ones."

The Retort Feminine.
Miss Olden—"Are those men following us?" Bute—"One of us."—New York Times.

People who seldom attend church frequently register a protest when the pastor desires a vacation.

One British military cemetery in France, just outside Boulogne, contains nearly 12,000 graves.

Owing to the shortage of small change in Paris, half the beggars have disappeared from the streets.

Near Blugent, in Germany, is a famous echo which will toss a sound to and fro no less than 70 times.

Renew your health by purifying your system with

Calotabs

Quick and delightful relief for biliousness, colds, constipation, headaches, and stomach, liver and blood troubles.

The genuine are sold only in 35c packages. Avoid imitations.

SQUEEZED TO DEATH

When the body begins to stiffen and movement becomes painful it is usually an indication that the kidneys are out of order. Keep these organs healthy by taking

GOLD MEDAL WARLEN OIL CAPSULES

The world's standard remedy for kidney, liver, bladder and uric acid troubles. Famous since 1895. Take regularly and keep in good health. In three sizes, all druggists. Guaranteed as represented. Look for the name Gold Medal on every box and accept no imitation.

CHOOSING GOWNS FOR BRIDESMAIDS

SINCE the costumes of her maids must make a picturesque background for the eminence of her own bridal white, it is the privilege of the bride to choose what they shall be. And here she may give her fancy a free rein; but the chances are that the enticing modes of today, drawn from so many periods, will keep it from wandering far. If she chooses current styles this year's bride will live to prove the axiom that a thing of beauty is a joy forever.

Taking into consideration the personality of her maids and all other circumstances, the bride may elect to have them dressed in sprightly organdy or taffeta, in quaint styles, or her choice may fall upon sheer voile, lace or georgette. In all of these there are colors that are adorable.

Two different types in gowns suited to bridesmaids are pictured above. The quaint full-skirted style at the right requires the crispness of organdie or taffeta to insure the bouffant skirt. It is trimmed with taffeta frills having picot edges and sewed into large disks that are graduated in size. The tight-fitting bodice has a round neck and short sleeves. A puff of net set in at the neck is a becoming item, not to be overlooked and the flower-trimmed hat, in a shape that suggests the poke bonnet, corresponds with the dress in style.

Crepe-de-chine, georgette or other supple weaves must be chosen for a gown like that at the left. It has a panel at the front adorned with frills of lace and hangs straight at the back with cascaded drapery at the sides hanging in points and longer than the skirt. The bodice has a square neck and elbow sleeves. Plain and figured chiffon or georgette might be used together in this dress, or wide lace might make the cascaded drapery and any of the sheer tissues the body of the frocks.

Costumes of Distinction

CHOOSING a costume for the bride is a momentous matter, but not difficult. Choosing a costume for the mother of the bride or groom is absorbingly interesting and somewhat difficult. Above all things these mothers must achieve distinction in their apparel for the great occasion and begin this accomplishment by exercising taste that is above reproach. They must not make the pathetic mistake of dressing too youthfully or the commonplace one of selecting styles that are ordinary or too elderly. The choice in styles depends upon the silhouette more than anything else, and that which has been found most becoming in the past should be retained.

Some mothers, and grandmothers even, retain a youthful face and figure, and for them there are dignified examples of current styles that make a selection easy. The two handsome

DAIRY THE DAIRY

PUREBRED SIRES HELP HERDS

Dairymen Cannot Expect to Obtain Improved Results From New Bull in the First Year.

(Prepared by the United States Department of Agriculture)

The production of the dairy herds of the future through the use of proper sires of high quality is a subject that is interesting dairy specialists of the United States Department of Agriculture. There is ample evidence that such bulls improve the production of their daughters, but it is a difficult matter even to estimate what the limit in improvement in future generations will be.

Figures compiled by the field man of the dairy division of the department who is encouraging bull associations in Maryland, show the improvement in production made by daughters of purebred sires belonging to the New Windsor Bull association, as compared with their dams. The six daughters of Repose's Masher gave an average of 8,107 pounds of milk in a year, and 328 pounds of butterfat. The average of the dams of these young cows was 6,782 pounds of milk and 266 pounds of fat. The average increase, therefore, was 1,415 pounds of milk and 60 pounds of fat. An additional production of over 1,400 pounds of milk and 60 pounds of fat is no slight matter, the dairy specialists say.

The ages at which the daughters of Repose's Masher made their records were three, four and five years, the average being about four. "When farmers put in purebred bulls to replace scrubs or grades, they sometimes have the feeling that the presence of the new bull is a charm which will increase the production of the herd right away," say the dairy specialists. "This is not to be expected. The cows which are bred to the bull

Influence of Purebred Bull is Shown Only on His Offspring.

are not themselves affected in their nature or their milk-producing ability. The influence of the bull is shown only on his offspring.

"It takes about four years before the first heifers from a new bull finish their first year's test; and as they are then only heifers, their mature mothers may still outdo them in production. The thing to be considered is, What character of young cows are to replace the old ones when the latter are gone?"

"This is the principle involved in bringing in meritorious bulls—to make the future cows better than the present. A dairyman should not expect to see the good results from a purebred bull in the first year, but wait three to five years and then see how much better his herd is. The dairymen should look to the future and plan now by using a good purebred bull to have a better herd in from three to five years. The question is, When these years have passed will he be where he was three to five years earlier or will he be better off? The wise dairymen, who takes the right course now, will at that future time find himself reaping the benefit."

SALT IS REQUIRED BY COWS

Give Only Small Quantity on Feed and Permit Animal to Lick Rock Salt in Boxes.

Salt is required by all animals. The dairy cow requires an ounce or more a day, say specialists of the United States Department of Agriculture, and while she should be given all she needs, she should not be forced to take more than she wants. It is best, therefore, to give only a small quantity on the feed, and to place rock salt in boxes in the yard where she can lick it at will.

TO PRODUCE BETTER BUTTER

First-Class Article Can Never Be Manufactured From Poor Material—Cream Must Improve.

The time is rapidly approaching when producers of cream will have to get this product to market in better condition. First-class butter never has and never will be produced from poor raw material. Such products are a burden to the industry.

Roughage Alone Not Enough.
The cow cannot give a large milk flow on roughage alone. Get a good grain mixture to balance the roughage and feed it according to the milk the cow produces.

Catarrh

Catarrh is a local disease greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE is a Tonic and Blood Purifier. By cleansing the blood and building up the system, HALL'S CATARRH MEDICINE restores to its work.

Helen—No; all the men here think I'm an heiress.—Portland Express.

Undoubtedly.
Old Man—"And if you had \$500 and multiplied it by two, what would you get?" Little Boy—"A motor car."

Rheumatism Comes From Tiny Pain Germs

First of all, get it firmly fixed in your mind that all the liniments in the world have no effect whatever on Rheumatism.

A very common form of Rheumatism is caused by millions of tiny disease germs which infect the blood. The one and only sensible treatment, therefore, is one which cleanses the blood of these germs, and routs them entirely out of the circulation.

This is why S.S.S., the greatest known blood purifier is so successful in the treatment of Rheumatism. It is a powerful cleanser of the blood, and will remove the disease germs that cause your Rheumatism, affording relief that is genuine.

S.S.S. is sold by all druggists. Free literature and medical advice can be had by writing to Chief Medical Adviser, 154 Swift Laboratory, Atlanta, Ga. S. S. S. is not sold or recommended for venereal diseases.

Not Spring Fever But Malaria CAUSES THAT LAZY TIRED FEELING.

BOBBY WANTED THAT AGATE IN YOUTH'S GAY SPRINGTIME

If Persistency Could Have Got it for Him, We Must Admit He Deserved it.

The older boys were playing marbles. Three-year-old Bobby wished some agates like his brother had and asked father for two cents to buy one with. The money was given to him and he immediately wished to go to the store to make the purchase. So persistent did he become that father said:

"If you don't keep still about that agate I will take those pennies away from you."

"What will you do with the pennies if you take them away?" he asked.

"Why, I'll put them back in my purse."

"Will you take them uptown when you go to the office?"

"Yes; I will."

After a few moments' reflection, Bobby came back with:

"And will you buy me an agate with them?"

He Knew.
"Willie, I suppose you know what a caterpillar is?" "Yes'm, it's an up-holstered worm."

Very Absent.
Maid—"Mum, the garbage man is here." Mrs. Newlywed—"Tell him I don't want any this morning."

Incident of Innocent Pleasure That Excited the Admiration of Gap Johnson.

"It shore does a feller good to see the innocent pleasure children get out of the coming of spring!" said Gap Johnson of Rumpus Ridge. "The first right warm day most of my young 'uns swarmed, as you might say. Wife took and ripped 'em out of their underclothes that she'd sewed 'em up in last fall, and they hit the path for the creek, scratching and cussing merrily."

"They found there seven or eight of Gabe Giggery's kids, three or four of Jim-Tom Tully's, a bunch of Zeke Yawley's and several more than no-body could tell whose they were till they got their faces washed. Well, then there was a grand hooraw as they all shucked themselves and whirled in to tying each other's clothes up in hard knots, and fighting about it, and such as that. Round and round and over and under they went, till they all fell into the drink and kept right on lammung each other till they knocked all the water out of the creek."—Kansas City Star.

Postponed.
"Then you don't care for this futurist art?"
"No, let the people of the future enjoy it."

Let the Children in, too!

It's no longer necessary to maintain a dividing line at the breakfast table—tea or coffee for grown-ups—no hot cup for the youngsters
